

# LIVE AND DEAD CENTERS

ROYAL MAKES THE BEST LIVE CENTERS ON EARTH

**ROYAL**  
PRODUCTS  
Optimize everything.

## WHY DO TOP MANUFACTURERS INSIST ON ROYAL LIVE CENTERS?

Royal live centers are widely regarded by top metalworking professionals as the best live centers available anywhere in the world. Each Royal live center is a finely crafted tool, incorporating the highest quality steels, bearings, lubricants and seals. Manufactured to exacting tolerances, Royal live centers are guaranteed accurate to  **$\pm 0.00005"$  TIR** or better.

Royal Products offers a broad range of standard live center models to suit virtually all turning applications. We also design and build hundreds of custom centers each year to meet special customer requirements. Custom live centers from Royal Products are competitively priced and are held to the same high manufacturing tolerances as our standard models.

# EXCLUSIVE ROTO-SHIELD™ TECHNOLOGY

## Only Available on Royal Live Centers

**ROYAL  
ROTO-SHIELD™  
TECHNOLOGY**

The new exclusive Royal Roto-Shield™ represents a **breakthrough in live center technology**, significantly increasing the effective operating life.

Royal Roto-Shield™ Technology consists of two main components:

- A live center point machined from a solid bar which incorporates a specially-shaped steel coolant slinger.
- A long-life, spring-loaded seal that is resistant to abrasion, high temperatures, and virtually all metalworking fluids.

A **dramatic increase in operating life** is achieved through the following effects:

- Coolant is deflected, keeping it from penetrating the center.
- Bearings are protected from harmful fines and dust.
- Seal wear is minimized.
- Lubricating grease lasts longer and retains consistency.

**The Royal Roto-Shield™ is a standard feature on the following Royal Live Center models:**

- High Precision Quad Bearing
- High Precision CNC Quad Bearing
- Heavy-Duty Spindle Type
- Heavy-Duty CNC Spindle Type
- The Ultimate™ Multi-Tasking Center
- High-Speed Precision
- All "Standard Specials"

**✓ High-Pressure  
Coolant Approved**

**Insist on Roto-Shield™ Technology – Only Available on Royal Live Centers**

**Check out the Royal Live Center  
Video at [www.livecenters.com](http://www.livecenters.com)**

# WHAT MAKES ROYAL LIVE CENTERS THE MOST RIGID?

One of the most common misconceptions regarding live centers relates to the internal length of the rotating point.

Some manufacturers believe that a long, thin point provides more rigidity than a short, thick point. But in fact, the opposite is true.

In order to verify that Royal's short, thick point provides superior rigidity over a long, thin point, we built the test fixture pictured above.

## Here's how it works:

- Both live centers have holes drilled in their shanks corresponding to the indicator locations.
- As radial force is applied evenly to the point tips by turning a centrally-located screw, the indicators are able to measure the internal deflection of each point.
- Almost immediately upon application of the load, the indicators show that **the competitor's point flexes 600% more than the Royal point!**

## Point Analysis of 4MT Spindle Type Live Centers

Royal Point

Other Brand Point

**D1 = Diameter of Royal Point = .603"**

**D2 = Diameter of Other Brand Point = .465"**

**Cross-Sectional Area of Royal Point = .285 sq. in.**

**Cross-Sectional Area of Other Brand Point = .170 sq. in.**

The cross-sectional area of the point on the Royal Center is 68% larger than that of the other brand, making the Royal point much more rigid and less likely to deflect under load.

Royal's thick, beefy point offers superior rigidity, resulting in tighter part tolerances and chatter-free surface-finishes.

See the test in action at  
[www.livecenters.com](http://www.livecenters.com)

## One Size Does Not Fit All – So We Turned Special Centers Into Standards!

One of Royal's strengths as a leading live center manufacturer is our ability to design and build custom centers to address non-standard applications. However, there are two major **drawbacks that are almost always associated with custom-made centers: longer lead times and higher prices.**

As an ISO company dedicated to continuous improvement, we decided to see if it might be possible to categorize special centers according to their similarities, and then offer a few new standard models that could handle most jobs.

Our engineers analyzed the prints of hundreds of special centers that we had manufactured over several years, and the results were shocking – **over 90% of our customers' special needs could be covered with just five new point styles.** These are:

Full-diameter long point for shaft work and parts with large center holes.

A reduced-diameter long point for use when greater clearance is needed.

A small bull-nose point for use with tubes or parts with large center holes.

A female point with a 90° included angle for locating on OD part chamfers.

A male point with a 90° included angle for locating on internal part chamfers.

**See pages 86-87 for  
ordering information**

**Royal maintains a full inventory of each model to ensure **same-day delivery**, and because we manufacture them in quantity, they are **very aggressively-priced.****

## ROYAL OFF-THE-SHELF "SPECIALS"

Deciding which live center model to use as a platform for Royal's new off-the-shelf "special" program was easy. We chose the High-Precision Quad-Bearing model for the following reasons:

- 1- Very Rigid Bearing Arrangement
- 2- Exclusive Roto-Shield™ Technology
- 3- Low-Profile Head

**All Models In Stock for Immediate Delivery**

**EXCLUSIVE ROYAL  
ROTO-SHIELD™  
TECHNOLOGY**

**✓ High-Pressure

# ROYAL ULTIMATE™ MULTI-TASKING LIVE CENTER

## Spring-Loaded Point for Lower Turret and Sub-Spindle Applications

- ☐ Designed specifically for use on the latest multi-tasking CNC machines with lower turrets and/or sub-spindles.
- ☐ Spring-loaded point overcomes the lack of hydraulic compensation found on tailstocks, protecting lower turrets and sub-spindles from overloading and/or crashes.
- ☐ Much longer operating life than other spring-type live centers due to the outstanding sealing characteristics of the exclusive Royal Roto-Shield™ coupled with a long-life spring-loaded neoprene seal.
- ☐ Heavy-duty bearing configuration and optimized spring-pak make the Royal Ultimate™ the perfect choice for all multi-tasking machines.

## ROYAL “OIL COUNTRY” BIG-BORE BULL HEAD LIVE CENTERS

The major and minor diameters of each head extend above and below nominal sizing – enabling each head to **cover a wider range of workpieces.**

Large capacity modular heads securely locate on a precision tapered shaft for maximum accuracy and rigidity.

$\pm 0.00025"$  TIR guaranteed.

Head angle is  $60^\circ \begin{smallmatrix} +15^\circ \\ -0^\circ \end{smallmatrix}$  for proper part engagement.

Steel shield and neoprene seal protect bearing assembly from coolant and chips for extended operating life.

Body and heads are hardened for strength and durability.

A heavy-duty tapered roller bearing, large axial thrust bearing, and two precision needle bearings combine for high load-carrying capability.

- ❑ Designed **specifically for machining large diameter pipes for the oil and gas industry**, but suitable for all large-bore applications.
- ❑ In contrast to standard bull head live centers, the modular head design of Royal “Oil Country” Big-Bore centers positions the workpiece closer to the bearing assembly for greater rigidity and longer operating life.
- ❑ Interchangeable **heads are relieved to achieve the optimal strength/mass ratio**, and are sized to cover a wider range of bore sizes with fewer models.
- ❑ Bearing configuration consisting of a heavy-duty tapered roller bearing, a large axial thrust bearing, and two precision needle bearings provides exceptional accuracy and rigidity under the most demanding production conditions.

**“Oil Country” Big-Bore Bull Head Dead Centers Also Available – See Page 111**

## ROYAL STANDARD PIPE & BULL HEAD LIVE CENTERS

- ❑ Designed for turning pipes, tubes, and parts with extra-large center holes.
- ❑ Two matched angular contact bearings provide good thrust and radial load ratings.
- ❑ Head diameter is 1/8" over nominal size, enabling these centers to cover a wider range of workpieces.
- ❑ Bull Head design is shorter than a pipe head, reducing potential interference in blind center hole applications and ensuring that the **load is positioned over the bearings for optimum strength.**
- ❑ Extra large capacity models also available – see previous page.

\* Maximum recommended operating limit. Operating above this speed could result in heat build-up and accelerated bearing wear.

## ROYAL CHANGEABLE-POINT LIVE CENTERS

\*Accuracy is guaranteed to be  $\pm 0.00005"$  TIR as long as the points are installed on the live center to which they have been match-ground. When a customer purchases a new point, we recommend sending the live center back to our factory so we can grind the new point to it. This service is free to Royal customers.

Two precision angular contact bearings help achieve good rpm and load ratings.

Shank, head, and points (except #4 blank point), are hardened for wear resistance and long life.

Precision ground tapers and single-lead threads ensure that **points consistently seat in the same location** when they are interchanged, providing maximum accuracy.

Steel shield and neoprene seal protect bearing assembly from coolant and chips for extended operating life.

- This versatile live center uses interchangeable points to handle many common turning jobs.
- Each center includes a #3 standard 60° male point. Other points sold separately.
- $\pm 0.00005"$  TIR guaranteed.\*
- Unique taper/thread design allows points to be easily interchanged and ensures accuracy.

**Check out the Royal Live Center Video at [www.livecenters.com](http://www.livecenters.com)**

# ROYAL DEAD CENTERS

- Dead centers are typically used for **grinding** and are also sometimes used in **high-precision turning** applications.
- Royal manufactures a wide range of standard dead centers to suit most applications, including: full, half, carbide-tipped, and extended-point models.
- All solid dead centers are made from ball bearing steel and are hardened to Rc 61-63 for wear resistance and durability.
- On carbide-tipped models, the carbide blank is brazed into a **close-tolerance socket for maximum strength and rigidity**.
- All Royal dead centers are ground to an angle of  $60^{\circ} \begin{smallmatrix} +15^{\circ} \\ -0 \end{smallmatrix}$  and guaranteed to  $\pm 0.00005"$  TIR.

Ball bearing steel hardened and ground to Rc 61-63 for long life.

## Type 1

Standard Dead Center  
add "1" to part number below.

Carbide blank is brazed into a close-tolerance socket for maximum strength and rigidity.

## Type 2

Standard Dead Center with carbide tip  
add "2" to part number below.

Half centers are relieved for grinding wheel clearance.

## Type 3

1/2 Dead Center  
add "3" to part number below.  
Note – Type 3 models are being phased out. Please call for availability.

A safety groove shows the maximum allowable regrind range for carbide-tipped models.

## Type 4

1/2 Dead Center with carbide tip  
add "4" to part number below.

## Royal Dead Centers

Example: A 2 MT dead center with a carbide tip is PART NUMBER 11012.

# ROYAL CNC THREADED DEAD CENTERS

## Great For Live Tailstocks and Precision Grinding

- ❑ Royal threaded dead centers are designed for use in CNC turning centers with **live tailstocks**.
- ❑ These dead centers are also widely used in precision grinding applications.
- ❑ Available in several styles to suit a wide range of applications.
  - CNC Point
  - Carbide-Tipped CNC Point
  - Full Diameter Extended Point
- ❑ Longer than normal gage length on all models provides outstanding clearance.
- ❑ Extraction nut and wrench flats enable easy removal from tailstock/spindle.

Extraction nut allows for easy removal from spindle. Order separately.

## IN CASE YOU MISSED IT.....

**ROYAL  
ROTO-SHIELD™  
TECHNOLOGY**

See video at [www.livecenters.com](http://www.livecenters.com)

## WHY TOP MANUFACTURERS INSIST ON ROYAL LIVE CENTERS

### Highest Quality

Every Royal Live Center is a finely crafted tool, incorporating the highest quality steels, bearings, seals, and lubricants. For more than 75 years Royal has been the brand that top manufacturers know and trust for their workholding needs. **For the thousands of parts that your centers will support, can you afford to go with anything less than a Royal?**

### Longest Life

Royal's exclusive Roto-Shield™ coolant deflector provides unmatched bearing protection by keeping contaminants out and clean grease in. It's not uncommon for a Royal center to last up to 3x longer than the competition.

### Exceptional Rigidity

Royal live centers are significantly more rigid than the competition – resulting in superior accuracy, part finish, and bearing life. Check out the test results at [www.livecenters.com](http://www.livecenters.com).

### High-Pressure Coolant Approved

Our hardened steel coolant deflector is integral with the rotating point and has been optimized for high-pressure coolant applications.

### A Model for Every Application

Between our broad standard line, our "off-the-shelf" specials, and complete custom center capabilities, Royal has all of your center needs covered.

### Same-Day Shipping

We maintain thousands of centers in stock to meet our goal of same-day shipping on all orders. **Order it today – you'll have it tomorrow.**

### Proudly Made in USA

Every Royal Live Center is made in USA in our modern, highly-automated factory. **We are extremely proud to be an American manufacturer supporting American manufacturers!**

**Once you try a Royal Center, you'll never settle for anything less!**

## ROYAL BRINGS INCREASED PRODUCTIVITY DIRECTLY TO YOUR COMPANY PARKING LOT

### Not Able to Visit a Tradeshow?

No problem – with Royal's nationwide fleet of fully-equipped mobile showrooms, **we can bring the show right to your company parking lot.**

Each of our demo vans is outfitted with dozens of productivity-enhancing CNC metalworking accessories that you and your team can see/touch/try firsthand, and then determine for yourselves how they might bring value to your company.

Schedule your visit today at [royalproducts.com](http://royalproducts.com)

### UNSURE? ROYAL HAS YOU COVERED!

With Royal's exclusive Risk-Free Performance Guarantee, **you can try many of our products on the toughest jobs in your shop for 45-days**, and if you aren't 100% satisfied with the performance, we'll take it back and arrange for a full refund.

How can we offer such a guarantee? It's simple – our products are all designed and built to outperform expectations, and very few customers are ever disappointed.

We understand that implementing new technology can be scary, and we are happy to alleviate your concerns by removing the risk.

**Call us today at 1-800-645-4174 to find out more.**
